AXIOM MATHS

Every year half of disadvantaged children who were top attainers at primary school don't go on to get top GCSE grades in maths. We exist to change this.

Axiom Maths partners with schools to help every child with the head and heart for maths realise their power. We support pupils in building the confidence to become adventurous, articulate and accepting young mathematicians.

What are maths circles?

Super-curricular groups where pupils tackle challenging and rewarding problems in a supportive, community-driven environment.

Our carefully crafted curriculum guides them on a five-year journey through the patterns of reasoning behind top-level mathematics, using novel contexts to deepen their understanding.

"We should be allowed to wear our PE kit to maths circles because this is a proper workout."

Pupil

"I can see how they understand maths differently."

Maths Excellence Coordinator

Our fully-funded programme includes...

01 ≈£3,000 per annum to fund a Maths Excellence Coordinator

02 A fully-resourced curriculum of extra-curricular mathematics

03 Training and development to establish maths circles in your school

04 Support to identify pupils who would benefit from attending maths circles

05 Access to summer camps and other maths events for your pupils

06 Opportunities for older pupils to train as ‘junior mentors’
